90%

Of interview insights go unused without structured scoring

Here's How SmartScreen™ Takes Back Control

Real conversations built for high-volume chaos:

1.

Interviews Like a Human. Thinks Like a Machine.

The AI recruiter holds free-flowing phone screens that feel personal—but scale like software.

2.

Validates Stories. Not Just Buzzwords.

Probes for logic, detail, and experience—no fluff, no faking it.

3.

Bias Doesn't Stand a Chance.

Structured scoring breaks down communication, confidence, and skill fit fairly, every time.

Why It Wins

Talks to 100s. Never Burns Out.

The AI recruiter handles what no human team could—without losing depth.

Always On. Always Fair. Always Sharp.

Ghosting disappears. Consistency doesn't.

Keeps You in Control. Powers You Up.

The AI flags the best. You make the call.
